### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: Independent claim 1 recites the limitations "a global history register for storing a branch history of previous sequential branch instructions for a plurality of the multiple processes; a hash logic for creating an index from a combination of a process reference of a process corresponding to a current branch instruction, an address of the current branch instruction, and the branch history for the plurality of the multiple processes," and independent claim 10 recites the limitations "creating an index to access the branch prediction table from a combination of a process ID of a process corresponding to the conditional branch instruction, an address of the conditional branch instruction, and a branch history comprising previous sequential branch instructions for a plurality of the multiple processes". Prior art discloses, when in a multiple process system, hash logic for creating indexes to a branch prediction table using the current branch address and the branch history, but does not teach also using the process reference or process ID, as stated in the amended claim limitations and the arguments filed 30 July 2004 and entered 07 September 2004 on pages 8-9.
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Aimee J Li whose telephone number is (571) 272-4169. The examiner can normally be reached on M-T 7:30am-5:00pm.
